COMPLETE YOUR HOME...

INTRODUCTORY WORD

Dear customers and business partners,

You hold in your hands the new catalogue of swimming pool and spa enclosures from Pool and Spa Enclosures LLC - member of IPC Team. IPC Team as the leading company of suppliers in this field, is proud to present to you our extended range of models.

You, our customers, represent an inexhaustible source of inspiration for us in our innovation of further products. Our professional team of architects and designers is ready to transform your wishes and requirements into reality.

We approach every product which we manufacture for you with the greatest of care, taking into consideration the dimensions of your swimming pool or patio, the spatial design and also your feeling for aesthetics. Thanks to our everyday experience and constant checks on the whole manufacturing process, we are able to push the boundaries of the technical, design and safety properties of our covers. We not only keep pace with the global trends, but make a major contribution towards shaping them.

The development of covers has undergone fundamental changes in recent years. We have created unique technical designs as well as technological patents which we use as standard in production. This gives you – the users – the certainty that an investment made into buying a cover manufactured by us will pay off and provide you with many happy moments.

The range of covers in many different colours and designs is represented by the POOL programme for covering swimming pools, the SPA programme for covering hot tubs and the HOME programme for variable enclosure systems which includes covers suitable for swimming pools that are located near or directly next to a house or wall. Our sales department and technicians are available to answer your questions, to provide specialist help or advice even if you require an individual solution to transform your ideas into reality.

Comprehensive customer care, presales and aftersales service are a priority for us. We are not only a development and manufacturing business, but also consultants and advisors, here to help you complete your home – a place where you can feel safe and comfortable.

I am certain that this catalogue will help you to make your decision and transform your wishes into reality.

Dear customers,

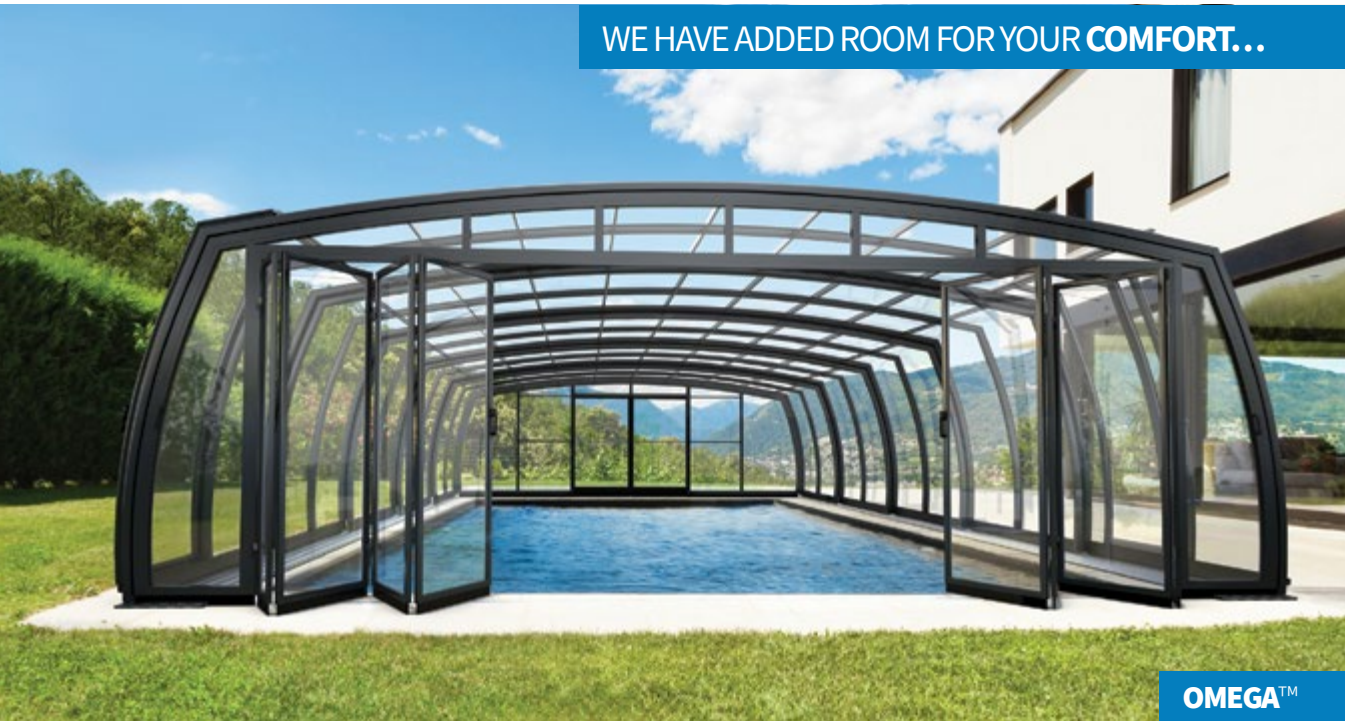

Thank you for the confidence you show in us and thank you for putting your faith in our original products for more than 20 years.

A stylized handwritten signature in black ink, appearing to read 'Jan Zitko'.

Jan Zitko
Chairman of the Board, ALUKOV a.s.
President, IPC Team

NEW FOR 2015

OMEGA™ COVERS

We named the OMEGA™ sliding pool cover after its characteristic shape which is reminiscent of the Greek letter of the same name. We have arched the walls of the pool cover outwards, which causes a positive spatial effect – the cover appears optically lower than it actually is and allows for ease of movement inside. With a combination of curved shapes and the original edges, our designers have achieved advantageous parameters for the cover meaning that its height is increased only minimally if you choose a wider version. The OMEGA™ cover in particular stands out in large gardens, near modern newly built houses, yet also next to conventional family houses whose owners demand more space from their swimming pool cover.

max. width: 32 ft / height: 7.3 - 9.8 ft / length: according to requirement

LOW RANGE

OCEANIC LOW MODEL

CORONA™

The Corona cover is the lowest two-rail pool enclosure system. This cover does its job perfectly and at the same time does not disturb the view of your garden. Characteristic for this model are vertical side walls and an unobtrusive arch joining on to them.

width: 9.84 - 19.68 ft / height: 1.57 - 3.9 ft / length: according to requirement

ELEGANT

The elegant shape of this cover has lent its name to the model. It offers fully fledged protection for your pool and thanks to the optimum curve of the arch, you can use your swimming pool even when covered if the weather is bad.

width: 9.84 - 25.28 ft / height: 2.78 - 5.57 ft / length: according to requirement

OCEANIC LOW MODEL

Clear as glass, fully or partially. We can offer you this level of comfort if you order this model with panels from clear compact polycarbonate with UV stabilisation the whole length of the cover. The comfort of swimming under the cover is preserved while at the same time offering you a superb view of your surroundings. Easy operation of the cover is ensured by the rails located on both sides.

width: 13.12 - 25.52 ft / height: 2.78 - 5.57 ft / length: according to requirement

VIVA™

A successful model providing disabled access which runs along a rail on one side only. This means that your pool is fully accessible from three sides by people with mobility issues. Together with the CORONA model, this is one of the very lowest covers in the low cover range.

width: 9.84 - 19.68 ft / height: 1.7 - 4.03 ft / length: according to requirement

IMPERIA

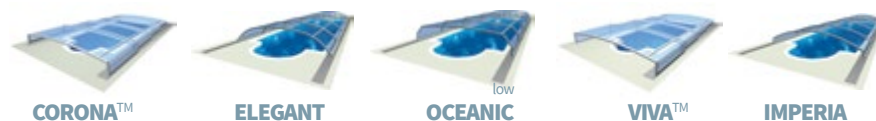

Low pool enclosure which protect you against bad weather and allows you to use you pool in cooler months. Imperia model offers a modern shape with a sharp edge. This enclosure will look beautiful in any garden.

width: 8.2 - 18,04 ft / height: 1.96 - 4.26 ft / length: according to requirement

POOL & HOT TUB COVERS

Do you want to indulge in the luxury of swimming in a covered pool, but don't want to block the view of the other end of your garden when looking out of the window? Then low covers are the perfect solution for you. Their height does not disturb your view of the garden in any way yet they are high enough for you to swim inside the covered swimming pool.

LOW RANGE

CORONA™

MEDIUM-HEIGHT RANGE

TROPEA

UNIVERSE

The wider models of this type have a roof height which you can walk under allowing you to get changed before you swim or dry off afterwards right under the cover. Sliding or swinging doors can be fitted to the front and back walls. Side-mounted sliding doors can be fitted into the side walls of the highest or lowest segment.

width: 8.2 - 29.5 ft / height: 2.62 - 9.2 ft
length: according to requirement

TROPEA

The spacious hall offered by this model allows you to move freely in the central section of the covered area. The cover walls can be manufactured from compact polycarbonate which is clear as glass. Thanks to this, the cover blends into its surroundings. This means that you can enjoy a view of your garden even from a covered swimming pool and not lose sight of where your children are playing even for a moment. This cover represents a compromise between the spacious LAGUNA and the low ELEGANT.

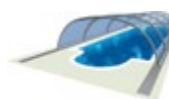

width: 13.1 - 29.5 ft / height: 4.9 - 8 ft
length: according to requirement

The well-known doctrine of the “golden mean” is quite appropriate in this case. Models in the medium-height range are designed by the designers in ALUKOV in such a way as to combine the best of low and high covers. They thus represent a universal solution for clients who are looking for a cover which is mindful of the design of their garden yet high enough to offer freedom of movement in the central section of the covered swimming pool. Simplicity of operation of the cover is ensured by a system for retracting the segments which allows them to be easily moved in both directions. If the rails are extended, the whole cover can be telescopically retracted right away from the pool area.

UNIVERSE

MEDIUM-HEIGHT RANGE

TROPEA

UNIVERSE

TROPEA

HIGH RANGE

OCEANIC HIGH MODEL

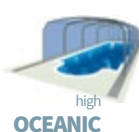

Moving around freely under the whole area of the covered space! That is the main advantage of high vertical walls which are the basic building block of high cover models. The high quality sliding system, tried and tested over the years, allows you to easily retract the cover in both directions. If the rails are extended, the whole cover can be telescopically retracted right away from the pool area. This leads to creation of space protected from the wind where you can easily place garden furniture and relax right next to the pool. The aluminium profiles which make up the frame of this cover can be manufactured in any colour you like including attractive imitation wood designs. This design is especially attractive for high frames such as LAGUNA or OLYMPIC™.

POOL & HOT TUB COVERS

LAGUNA

This spacious cover can be used not only to cover your swimming pool, but also as a “lounge” where you can relax comfortably with your family or friends out of the wind after swimming. Positioning of the cover away from the pool area is ensured by an ingenious system which allows you to easily retract the frame in both directions.

OCEANIC HIGH MODEL

Inside an OCEANIC – high model cover you will have almost as much space as on the open sea. The attractively designed cover where the roof joins onto vertical walls is in part sloping and in part curved. A wonderful centrepiece for your garden.

OMEGA™

With an OMEGA™ cover, you get extra space as its frame allows the cover to be widened without the height being affected significantly. See p. 3

ORIENT

A fascinating frame similar to those seen in the fairy tale “One Thousand and One Nights” or in countries in the Orient. The hemispherical shape helps maintain the temperature. The movable part of the cover can be easily retracted along the rail. This system allows you to uncover more than $\frac{1}{4}$ of the swimming pool which regulates the temperature on hot days and at the same time allows sunshine to fall directly onto the swimming pool.

RAVENA

For clients who are looking for the ideal size to functionality ratio, this cover model is the optimum solution. This concerns a combination of vertical walls enclosing the ground at an angle of approx. 80° and arched segments. The shape of the cover allows for unrestricted movement around 3 sides of the pool. A sliding door is located in the vertical side wall and a sliding or swing door can be fitted into the front or back wall. This model is especially attractive for swimming pools located next to buildings or walls. Thanks to the modern design and novel appearance, this model is very popular and in great demand among clients.

VENEZIA

The design of Venezia is similar to the Imperia model from the low cover category, the difference being that this type provides enough space for you to walk under. Another specific for this type is a frame made of aluminium profiles which have the greatest load-bearing capacity and rigidity of all pool cover models. This attractive model is preferred by many customers due to its shape and large internal space. It ensures a pleasant time in your pool on hot and also cooler days.

OLYMPIC™ COVERS

OLYMPIC™

The TOP product from Pool and Spa Enclosures Company, which catches your eye with its exceptional design and novel appearance. Its frame is made up of 1 or 2 semi-domes (circular sections) which complement the standard shape of the cover segments. The main advantage of this model is the possibility of moving freely around the whole of the covered area. The system for retraction of the segments allows you to easily retract them in both directions. The retracting part of each semi-dome can be opened from the centre. Opening and closing of the cover can be easily managed by one or two people (depending on the size of the frame). Electric motors can also be used to retract the cover. The aluminium covers can be supplied in a very attractive colour option, imitation wood, which is particularly impressive on large pool cover models like this.

width: 16.4 - 36 ft / height: 8.5 - 9.8 ft
length: according to requirement

OLYMPIC™

OLYMPIC™

MODELS COMBINATION

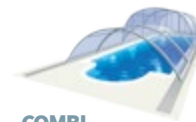

COMBINED ENCLOSURES

COMBI, ATYPICAL

This concerns a frame combining two to three standard types of cover. You can thus easily achieve the ideal combination of a protective function for the pool and a spacious entrance segment or conventional elongated shape with a semi-dome. Combination of low segments and one or two higher segments is most popular.

COMBINATION OF COVERS

ATYPICAL ENCLOSURES

COMBINED ENCLOSURES - OCEANIC LOW AND OCEANIC HIGH

HOT TUB COVERS

SPA DOME ORLANDO® SMALL & LARGE

Should light shine into the area where your hot tub is, should you be able to see in or would you prefer a more discreet design? The original frame of this model is created using aluminium profiles which have a Komaxit powder coating. The panels between these profiles can come in several forms. Thanks to material called compact polycarbonate, we can create panels for you which are clear, translucent or have a discreet bronze (smoked) colouring. This cover is made up of peripheral sections, door sections and a canopy. The dome which is created is set on a circular rail which allows for rotation around 360° in both directions (Only for the **SPA DOME ORLANDO SMALL**). This model is characterised by ease of assembly, the basis of which is anchoring of the rail to a firm foundation which could for example be concrete or ceramic tiles.

SPA DOME ORLANDO®

SPA DOME ORLANDO® SMALL

SPA DOME ORLANDO® LARGE

SPA DOME ORLANDO® SMALL

SPA DOME ORLANDO® SMALL
inner diameter: 13.1 ft / outer diameter: 13.4 ft / height: 7.5 ft

SPA DOME ORLANDO® LARGE
inner diameter: 16 ft / outer diameter: 16.4 ft / height: 8.8 ft

SPA SUNHOUSE® / SPA GRAND SUNHOUSE®

SPA SUNHOUSE® / SPA GRAND SUNHOUSE® covers are an oval version of SPA DOME ORLANDO®. With a view to their larger dimensions, they also offer more usable space. They have an opening roof and two sliding doors. The model is made up of two semi-domes (like a SPA DOME ORLANDO® which has been cut in half), two straight cover segments with side-mounted sliding doors and a canopy with a sliding roof which can be opened to provide better ventilation. The double sliding doors located in one of the semi-domes allow for operation of the hot tub and also serve as the main entrance to the cover. The version with bronze (smoked) compact polycarbonate partially blocks the sun, providing pleasant shade for the eyes and helps to maintain a comfortable temperature inside the cover. The structural elements ensure not only easy and effective assembly, but also undemanding maintenance for both types of cover.

SPA SUNHOUSE®
SPA GRAND SUNHOUSE®

SPA SUNHOUSE®: width: 13.5 ft / length: 20.2 ft / height: 7.5 ft SPA GRAND SUNHOUSE®: width: 16.4 ft / length: 26.2 ft / height: 8.8 ft

SPA GRAND SUNHOUSE®

SPA SUNHOUSE®

SPA GRAND SUNHOUSE®

HOT TUB COVERS

OASIS™ - SMALL

The OASIS™ - small cover combines just the right proportion of properties offered by the SPA Sunhouse® and CORSO™ ENTRY models. The great advantage of this model is a frame designed to cover space whilst making use of an existing vertical wall. An area covered in this manner can be used to enclose a hot tub or a small swimming pool. It is also suitable for covering a gazebo for spending your free time in the garden. The roof can be opened and it offers one or two sliding doors. The semi-dome has a wide opening and sliding roof for ventilation. The version with bronze (smoked) polycarbonate protects you against the sun and naturally regulates the internal temperature to a comfortable level.

width: 13.5 ft / length from the wall: 13.4 ft / height: 7.5 ft

OASIS™ SMALL

OASIS™ LARGE

OASIS™ - LARGE

As is evident from the name, this is a larger version of the OASIS™ SMALL. The length of this extended type of cover is just under 19.7 ft.

**width: 16.4 ft / height: 8.8 ft
length from the wall: 18.3 ft**

OASIS™ LARGE

CORSO™ RETRACTABLE PATIO COVERS

ENTRY

This model is suitable for use as a cover for swimming pools or hot tubs which are located right next to a house. Part of this cover rolls telescopically along rails fixed to the wall of the house (at the top) and to the tiles. The system allows for wide opening of internal areas.

width: 9.8 - 14.7 ft / length and height according to requirement

A NEW, MODERN CONCEPT OF COVER FRAMES FOR SWIMMING POOLS
WIDEST OFFER OF TYPES AND DESIGNS OF POOL COVERS ON THE MARKET

PLEASURE

- Prolongation of the swimming season from spring to autumn
- Just slide back the cover to swim in the open air on hot days
- Time savings and easier swimming pool maintenance
- Protection against impurities falling into the pool (leaves, pollen, and insects)
- Increase in water quality and decrease in amount of chemicals for water treatment
- Constant water temperature in the swimming pool overnight
- Easy operation
- High solar effect and thus lower costs for heating days
- Free water heating depending on the intensity of the solar radiation

AESTHETICS

- Individual solution and optimum model for your swimming pool
- Choice of colours for aluminium frames, resistant Komaxit treatment
- Choice of colours and types of polycarbonate panels ranging from clear to smoked
- Neat invisible design for technological joints
- Refined and professional finish to products

SAFETY

- Protection against children and pets falling into the water
- Complex locking system to protect the cover against damage by strong wind
- Possibility of fully locking the cover - "child safety feature" - in the NEO™ design, the first completely secured system offered in a basic version
- Prevention of skin cancer thanks to filtering out of harmful UV radiation
- Protection of the swimming pool against bad weather and UV radiation
- System of flat anti-slip KOMFORT and PROGRES rails which you can walk on
- AIR FRESH system – ventilation system protecting your pool against overheating on hot days

RELIABILITY

- Reliable and durable method of sealing polycarbonate panels in the aluminium frame
- Reinforced profile frame for the front wall
- Option of combining hollow 10 mm polycarbonate with compact 4 mm
- Reduction of damage to the swimming pool caused by winter weather
- Warranty period of up to 15 years for selected models
- **Comprehensive customer care, presales and aftersales service**

PRESENTATION OF THE COMPANY

Pool & Spa Enclosures, LLC is a member of the IPC Team. The IPC Team is one of the best recognized manufacturers of telescopic enclosures for pools and spas in the industry. High quality assembly and top quality components coupled with superior, patented designs have made the IPC Team the leading producer of swimming pool enclosures in the world. The founder of IPC Team is company Alukov a.s. - Czech firm with more 20 years of experience.

The history of the company Alukov dates back to the last century, it was founded in 1995 with the original plan to manufacture aluminium door and window frames. In the following years, our company was adjusting to the market demands reflecting the growing economic development in the Czech Republic and it began to specialise in manufacturing telescopic swimming pool enclosures. The first series of swimming pool enclosures was created in 1995. Currently we produce 3 enclosure programs: HOME PROGRAM – patio enclosures, POOL PROGRAM – more than 30 models ranging from low to high and SPA PROGRAM – spa enclosures.

With vast financial investment and several years of developing telescopic enclosures, Alukov has proudly produced patented products. We work with reliable, tried and tested suppliers of high-quality materials, so that our products comply with the strictest criteria. The main factory is based in the Czech Republic and spreading over 30 000 m².

Another plant was built in Slovakia and Hungary, with the area of 20 000 m². Thanks to the large production volume (3,000 enclosures per year and 500 employees) we are one of the largest manufacturer of bespoke enclosures in the world. Our smart logistic system consists of a modern vehicle fleet of 30 trucks, 5 service vehicles and 20 cars. The quality of our products has been certified by experts in the area of quality control ISO 9001, ISO 14001 and by the French research institute in Paris (Laboratoire National D'essais) since 2005. Our swimming pool enclosures comply with the safety and quality standard NF P90-309.

We proudly display the below standards of certification while delivering unmatched customer satisfaction. High standard procedure of quality control, state of the art technologies, fast and reliable service is a must. Swimming pool, hot tub and patio enclosures are made with care. We use top quality materials and our production are approved by ISO 9001, ISO 14001 and AFNOR certification.

Alukov has established its connections in 40 countries all over the world, thereby creating the largest sales network in this field. The company has been continuously innovating its activities on the basis of customer requirements. Recently, we have opened showrooms in the Czech Republic – in Prague and Brno, in Wien and in Wels in Austria, near Bratislava in Slovakia, in German Dresden, in Swiss and even in Los Angeles in the USA.
